

Manufacturing Technician | £34,726.95 to £36,306.96 | 42 hours per week average

Build your career in semiconductor manufacturing as part of a growing production team.

Clas-SiC Wafer Fab is in its 10th year of business, supplying specialist semiconductors across the globe. We're a team that has grown the company quickly to be a world leader in our sector. We are looking to expand our team further as we continue to grow.

Join our growing production team as a Manufacturing Technician and help create high-quality semiconductor products in an innovative, fast-moving industry. This is an excellent opportunity for someone who takes pride in accurate work, enjoys solving problems and wants to develop new technical skills.

You will support day-to-day production in our manufacturing facility, following established safety requirements and standard operating procedures to deliver consistently high-quality products.

The role works a rotating day-and-night shift pattern; the stated salary includes a 25% shift premium. With a 4-shift on, 4-shift off rotational 12-hour shift pattern, work-life balance is easily achieved.

What you'll do

- Operate with a lean-production mindset, helping individual processes and production flows stay on schedule
- Follow all equipment instructions, process documentation and standard operating procedures
- Support the team in meeting quality and customer delivery targets
- Maintain high Health, Safety and Environmental standards at all times

What we're looking for

- Standard Grade English and Mathematics, or the ability to demonstrate equivalent competence and a willingness to learn
- Experience in semiconductor production is advantageous; manufacturing experience and an enthusiasm for learning new skills are also welcomed
- A reliable, dedicated approach and strong attention to detail
- The ability to work effectively as part of a small team
- Strong problem-solving skills and a practical approach to challenges

Clear opportunities to progress

Your starting grade will reflect your experience and skills. You can increase your salary through a transparent, evidence-based grading process that recognises flexibility, capability and contribution.

Previous applicants do not need to reapply.

Employment type: Full-time, permanent

Salary: Grade 2–6, plus a 25% shift premium

What we offer

- Company pension
- Share options
- Structured salary progression
- The opportunity to build a career in a growing, innovative industry
